BRIGHT

■ COLOR ■ RESOLUTION ■ CONTRAST ■ PERFORMANCE

Fidelity Bright™ is a full immersive theater solution designed to produce bright, bold, colorful & razor-sharp results.

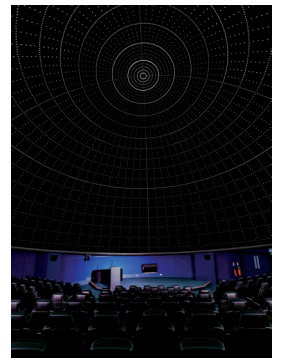

By expertly engineering, modifying & integrating off-the-shelf, professional grade technologies, Fidelity Bright™ provides a cost effective, premium quality theater solution from the outset.

Fidelity Bright™ uses state-of-the-art technologies and modelling techniques for unique theater designs, uncompressed content, perfect blending and pixel management and seamless facility control – combine this with our add-ons of custom lighting, audio, seating systems and more to create a distinctive **Fidelity™** theater experience.

Using extensively developed tools, processes and partner relationships, we shape commoditized products into full solutions to produce the results you dream of – on time, and on budget.

Our unique open-architecture server solutions allow content delivery from virtually any source without the need for compression, and our components are compatible with other vendor technologies – enabling us to supply you with a fully flexible, future-proof solution.

Fidelity Bright™ has been integrated into some of the biggest and most advanced immersive theaters – producing results that amaze and delight audiences worldwide.

FEATURES

- Bright, sharp & colorful with low cost of ownership
- Wide selection of projection technologies from our recommended partners (projectiondesign®, Christie®, Digital Projection® and JVC®)

THE THEATER

Fidelity™ solutions can include seating layout & installation, design, pre-show areas, screens, back-up systems, ticketing systems, interior design, project management... as much or as little as you need.

PROJECTION

Fidelity™ projectors are selected from the manufacturer and engineered in-house using our exclusive 22-stage process for a matched, seamless, crystal-clear Fidelity™ display.

IMAGE MANAGEMENT

Meticulous image distortion correction, expert pixel management, accurate geometry and perfect optical and electronic channel blending are standard components of every Fidelity™ solution.

CONTENT

Tailored Fidelity™ software suites can include Global Immersion Media Director (drag 'n' drop production/editing tool) and Uniview™ real-time data visualization/astronomy platform. We distribute shows and vignettes from the leading content houses around the world, and also offer custom show production for your specific requirements.

MEDIA SERVERS & STORAGE

Our unique Media solutions stream lossless, ultra-high resolution content in proprietary formats to provide highly redundant solutions and to preserve the Fidelity™ from disc to display.

AUDIO, LIGHTING & CONTROL

Customized Fidelity Bright™ systems can include the latest surround sound audio configurations, innovative LED lighting systems – all controlled via a pre-programmed, wireless touch-screen panel which will also manage all other components of your theater system.

CARE

As standard, each Fidelity™ solution includes warranty, remote diagnostics, 24/7 telephone & email support plus much more. Our Care team designs support packages to include spares, repairs, maintenance and extended warranty to keep your system looking consistently perfect.

Our award-winning range of **Fidelity™** display solutions have been rigorously developed over more than eleven years to provide an optimum balance of:

- Performance
- Stability
- Cost

Our systems aren't wedded to a particular technology or process – we custom-design each and every system to reflect the individuality of your request depending on your budget, application and your dream.

Combined with extensive know-how and skills, a **Fidelity™** solution will provide dependably stunning images for years to come.
