

# fidelity™

## GO

■ TAKEAWAY ■ PLUG ■ PLAY ■ GO

**Fidelity GO™ is designed specifically for dome theaters up to 13 meters in diameter – using cost-effective LED projection technology to produce stunning results for a takeaway price.**

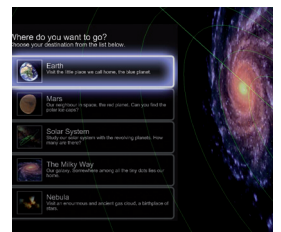

**With performance, intelligence, precise system modelling and our unique approach to engineering all built into the system, the Fidelity GO™ full theater kit includes everything you need for a superb immersive theater.**

**Fidelity GO™** is a premium solution for smaller dome theaters using LED projection technology, a high-powered server system and a range of other Fidelity™ solution components in a highly affordable, ready-to-go configuration.

**Fidelity GO™** uses the projectiondesign® FL32 LED projector for color and contrast levels comparable to those of a laser projector... at a fraction of the cost. The projector has no color wheel, requires no calibration or lamp changes and has extremely low power consumption – so maintenance is minimal with a lamp life that can exceed 100,000 hours.

**Fidelity GO™** solutions are delivered literally ‘ready-to-go’ – all engineering and modification takes place at our UK development facility and we can even train your technical staff if you wish to install the system yourselves.

**Fidelity GO™** personifies simplicity, without compromising on performance. The content is uncompressed, the display is perfect and the results are awe-inspiring... great things really do come in small packages.

## THE BASICS

- Fidelity™ projectiondesign® FL32 WUXGA projectors – exclusively optimized & engineered by us during our 22-stage Fidelity™ process for:
  - Color and gamut matching
  - Superior contrast, color brightness & resolution
  - Seamless image display
- In-built pixel management & image distortion correction
- Wireless, touch-screen, pre-programmed control panel
- Fidelity™ Software Suite including Media Director production & editing package (GUI/Drag ‘n’ Drop) & Uniview™
- High-powered, uncompressed Fidelity™ Media server system
- 24/7 support, remote diagnostics & warranty
- Comprehensive training package
- **All ready-to-go for a takeaway price**

THE TECHNOLOGY

**projectiondesign® FL32**

- 100,000 hours lamp life and extremely low power consumption
- No required recalibration or adjustments, and no lamp changes
- Failsafe RealLED™ Technology for consistent brightness and color
- LED technology produces bright and electric color
- Compact, configurable and easy-to-operate
- High resolution configuration
- Wide range of available lenses for full flexibility

**THEATER**

Seating layout & installation, design, pre-show areas, screens, back-up systems, ticketing systems, interior design, project management... as much or as little as you need.

**CONTENT**

Uniview™, Shows and vignettes from the leading content houses around the world – also the option for custom show production for your specific requirements.

**AUDIO, LIGHTING & CONTROL**

Custom sound audio configurations, innovative LED lighting systems – all controlled via a pre-programmed, wireless touch-screen panel which will also manage all other components of your theater system.

**CARE**

Add-on support packages can include spares, repairs, maintenance and extended warranty to keep your system looking consistently perfect.
